PROFILE

Full stack engineer with 7+ years of Angular and .NET Core across healthcare, UN and enterprise products. I work mostly on micro frontends: breaking monoliths into apps that ship on their own, building the shared UI libraries that keep them consistent, and the YARP gateways and .NET APIs behind them.

EXPERIENCE

Senior Software Engineer, Systems Plus — Jan 2026 – Now · Pune

- Moving a legacy monolith onto a micro frontend architecture as part of a replatform project
- Migrated local components into a shared UI library; every micro frontend now uses it, across 4 projects
- Upgrading backend services to .NET 9
- Delivered the planned features ahead of schedule
- Helping the team use AI tools wisely and correctly in day-to-day work
- Proposed a solution at a company hackathon that is now on the upcoming roadmap

Software Engineer, EPAM Systems — Nov 2024 – Dec 2025 · Pune

- Built an Angular micro frontend app that several products run on
- Maintained a shared Angular library so each app didn't rebuild the same components
- Worked on .NET Core APIs sitting behind a YARP reverse proxy
- Wrote service aggregators that combine several backend calls into one endpoint
- Worked in agile sprints with cross-functional teams

Lead Software Engineer, Nitor Infotech — Aug 2021 – Nov 2024 · Pune

- Shipped several full-stack projects on Angular, .NET Core, and SQL Server
- Built reusable UI components with Angular Material and PrimeNG
- Sped up API responses by adding caching and gzip compression
- Led a team of 3 developers and 1 QA on UNIDO DIPS
- Recognized for delivering on time without cutting corners on quality

Associate Level 3, smartData Enterprises (I) Ltd. — Feb 2019 – Aug 2021 · Nagpur

- Built full-stack features for healthcare and service-business apps
- Built a PDF form builder and an appointment calendar module from scratch
- Talked with clients directly to pin down requirements
- Estimated tasks during sprint planning
- Was the go-between for clients and the dev team

SIDE PROJECTS

Samyo — Booking and operations app for event businesses. `samyo.in`

@datelane/core — Zero-dependency Angular scheduler and calendar. `npm`

SKILLS

Frontend	Angular, Micro Frontends, TypeScript, HTML5, CSS/SCSS, React, Angular Material, PrimeNG
Backend	.NET Core, C#, Entity Framework Core, YARP, Microservices, RESTful APIs
Database	SQL Server, PostgreSQL, Database Design, Performance Optimization
Cloud & DevOps	Azure, AWS, CI/CD, GitHub Actions, Docker
Tools & Libraries	AmCharts5, Survey.js, Angular Gridster2, JWT Authentication, Swagger, GitHub Copilot

EDUCATION

Master of Computer Applications, Shri Ramdeo Baba College of Engineering and Management — 2019

Bachelor of Computer Applications, College of Management and Computer Science — 2016

CERTIFICATION

Microsoft Certified: Azure Fundamentals — 2025
